Supporting Investigators Throughout the Research Process

GHUCCTS is a partnership of five institutions - Georgetown and Howard Universities, MedStar Health Research Institute, Washington DC VA Medical Center, and Oak Ridge National Laboratory - that work together to develop and advance clinical and translational science. GHUCCTS supports its' investigators with the following services.

GHUCCTS PROVIDES

Consultation Services

Expertise on all phases of research for:

- Study-specific research development (Study design, proposal preparation, dissemination)
- Participant Recruitment
With focus on diverse populations including people from diverse racial, ethnic, and cultural backgrounds, older adults, persons with disabilities, veterans
- Support with data collection, management, and analytics
- Integration of culturally and linguistically competent approaches
- Use of best practice on Community Engaged Research (CEnR).
- Research Participant Advocate input
- Patient centered input from an established Participant Advisory Board (PAB)
- Multi-site study support
- GHUCCTS Central IRB, SMART IRB

Research Operations Support

- GHUCCTS institutions Clinical Research Units provide research space & trained personnel
- Lab & research pharmacy services
- Bioinformatics & clinical informatics support.

Recruitment Support

- Cohort discovery through electronic health records
- Participant-engaged research design and support
- Print & digital advertising, community outreach

Funding

- Pilot: \$40K funding opportunities for pilot studies focused on promoting interdisciplinary research and translating basic findings into clinical and community applications.

Education & Training Opportunities

Workshops:

- Responsible Conduct of Research (RCR) Training
- Grant Writing Workshop Series
- Mentor Training Workshop

Mentored Career Development:

- TL1/Translational Biomedical Science Program
- KL2 Junior Faculty Scholars Program

Degree Programs in CTR:

- Master's in Clinical and Translational Research
- Graduate Certificate in Clinical and Translational Research
